

MINISTER GOSPODARKI

Piotr Grzegorz Woźniak

Warsaw, 22 March 2007

DRO-IV-260-52-MK

L.dz. 471/07

Mr.

Matthias Warnig

Managing Director

Nord Stream AG

SW,

Please be informed that although the „Offshore pipeline through the Baltic Sea” report by Nord Stream AG of 16 November 2006 is neither a complementary nor an accurate document, it appears that an outlined investment of a gas pipeline has been situated across the Polish exclusive economic zone (EEZ).

As § 3.2 and draft chart Dwg.3.1 of the Report the border of the Polish EEZ has been clearly presented in a different way than on the commonly available Polish maritime navigation maps.

According to the inaccurate chart Dwg.3.1, attached to the report, the projected gas pipeline enters the Polish EEZ between points no 21 and no 24, within geographical coordinates (E16,4633 N55,5933) and (E14,2875 N54,5567). After detailed analysis it has been found that the above coordinates correspond to 55° 16' 16,277"N; 016° 07' 12,368"E and 54° 39' 37,087"N; 014° 43' 20,981"E respectively as per publicly available Polish maritime navigation maps.

Regarding the mentioned above, I avail myself to notify that any investment activities in the Polish EEZ are subordinated both to international laws and national laws and regulations of the Republic of Poland.

Sincerely,
